

## 2020 GAM Completion

Use of the IASC Gender with Age Marker (GAM) increased in eight countries in 2020, while decreasing in twelve.

There has been promising uptake in countries new to the GAM and those with minimal uptake in 2019; globally, over 11,000 projects have applied the GAM to date. Positive GAM coverage in the IAHE Evaluation of gender in humanitarian programming and significant global reports in 2020 should lead to its increased promotion and use.

The IASC Results Group target for 80% of humanitarian projects to apply the GAM in 2020 was only met in **Myanmar (92%)** and by the Regional Refugee and Migrant Response Program for Venezuela, where its use was energetically promoted and supported by UN Women (2019 and 2020), UNOCHA, and GenCap (2019).

Country	2020 Approved projects <sup>1</sup>	With completed GAM		2019 GAM completion	Total GAMs recorded to date	% Errors reporting GAM code <sup>2</sup>

<sup>1</sup> HPC, FTS or GMS information

<sup>2</sup> Reflects persistent misunderstanding of the purpose of the GAM, that the code is used to determine project selection and funding.

32 organizations have applied the GAM more than 50 times in their operations around the world, accounting for 35% of all GAMs completed to date. At Nov 30 2020, top users are,
